LA HACKS LA HACKS LA HACKS

Hack with us

Everything you need to architect, build, and deploy on CREAO and win a prize track.
Build it at the hackathon. Take it further with CREAO.

LA HACKS

Join the CREAO Prize Tracks (Upgraded Account)

01

Register

Sign up with this link to get an upgraded account for the hackathon:

Register here

This grants you access with an upgraded account (Pro-level features, paid models, scheduled runs, and extra credits for the weekend).

02

Submit Your Project

Submit on the LA Hacks Devpost and **select the CREAO track**. Projects that don't select the track won't be judged for it.

Submit here

Run out of credits? Message us in our Discord channel or come to the CREAO booth to request more credits. We top up hackers on request.

The One Requirement

At least one CREAO agent does the core work of your project.

01 Build that agent on agent.creao.ai. You can use more than one.

02 Build In your Devpost README, include a share link to one of the agent's runs and the agent ID (shown on its page).

03 Show the agent running in your demo.

That's the whole rule. How you use CREAO beyond it is up to you.

The Prize Tracks

One rule for every track: a CREAO agent does the core work. Pick the track that fits.

03

Disruptor — $2,000

Remove the agent, and the product stops working.

- **Win if:** your app runs on the agent's output, end to end.
- **Build with:** API Trigger + webhooks, connectors, Browser Use, your own tools

Company — $1,000

One human operating like a funded startup.

- **Win if:** you show an org chart of agents that hand work to each other.
- **Build with:** one saved agent per role, coordinated by a scheduled /workflow (no code) or an orchestrator via API Trigger

$500

Agents as the connective tissue between people.

- **Win if:** your agents make a team work better together without replacing anyone.
- **Build with:** Slack, Teams or Notion connectors, scheduled runs, webhook handoffs

CREAO Launchpad: The Real Prize

You built something promising. CREAO will help you take it beyond the hackathon.

Every winning team is invited into CREAO Launchpad, our post-hackathon program for the next generation of builders. Instead of a one-time prize, Launchpad is continued investment in you and your project:

1 year of CREAO Pro Max ($1,440 value) — a full year of platform access to keep building and developing your product on CREAO, like a lightweight incubation period with continued platform support.

Product, technical, and founder mentorship — guidance to help turn your prototype into something real.

CREAO meet-and-greet — sit down with a successful founder/member of technical staffs, ask anything, and get direct advice on your journey.

Demo opportunities — showcase what you continue building after the event.

Launch support and amplification — when your project is launch-ready, CREAO helps amplify it through our community and content channels.

Career opportunities with CREAO — winning teams get interview opportunities. Yes, we're hiring.
