# Paper for Hackers

Design at hackathon speed. Get your whole team on Paper Pro free for a month, and compete for up to $1,500 in the Best Designed Hack.

## Paper is the design tool for teams building with agents, so design keeps up with the speed of engineering.

Paper is a canvas where you, your team, and your agents work together. Built on HTML and CSS, so it's a visual extension of working in code rather than a separate file you translate back later.

the canvas yourself, or ask the agent to generate something from scratch and build off it.

Paper is used by Lovable, Ramp, Vercel, and many teams in the current Y Combinator batch as their design canvas.

## How to use Paper for LA Hacks

1. **Create a style guide from nothing**

   Tell your agent the vibe and it'll put a few directions on the canvas. Mix and match your favorites.

2. **Turn your build into screens**

   Point your agent at what your engineering agents are working on, and it'll curate first drafts in Paper, in your style. Then keep iterating!

3. **Send it back to code**

   Tell your agent to look at the file and build it. What you design is what ships.

## Best Designed Hack

We're challenging hackers to build the best designed project at LA Hacks! We'll judge on:

1. Adherence to design fundamentals (hierarchy, legibility, consistency, contrast, etc.)
2. Ease of use
3. Personal craft and character; differentiate yourself from clearly AI-generated designs

**Prizes**

| | |
|---|---|
| 1st place | **$1,500** |
| 2nd place | **$1,000** |
| 3rd place | **$500** |

# Get ready for the weekend

1. **Download Paper**

   Get the desktop app so your agents can connect to the canvas over MCP.

2. **Get Pro free for a month**

   Redeem `LAHACKS26` on a monthly plan to upgrade your team of four.

   If you're already on a Pro plan, email team@paper.design and we'll apply a coupon.

   Your Paper Pro plan will renew after one month, so make sure to cancel prior to that date or email us proof of enrollment to continue free access for a year.

3. **Invite your team**

   Add your teammates so everyone designs on the same canvas.
